

Rotor Single Station Tester with Conveyor Line

The following is the introduction of high quality SHUAI RUI® Rotor Single Station Tester with Conveyor Line, hoping to help you better understand Rotor Single Station Tester with Conveyor

Line. Welcome new and old customers to continue to cooperate with us to create a better future!

SHUAI RUI® Rotor Single Station Tester with Conveyor Line

Equipment introduction:

1.This machine is used for rotor testing procedure.

Suzhou SHUAI RUI Automation Equipment Co., LTD

Address:No.35 Aige Hao Road, Weitang Town, Xiangcheng District, Suzhou

Tel:+86-18962186860

Fax:+86-512-68183855

E-mail:Xiaoshou1@sz-shuairui.com

- 2.The test speed is fast and the rotor is positioned quickly, saving time and improving production efficiency.
- 3.The stylus adopts a bladder type to ensure the consistency of the pressure of each stylus.
- 4.Withstand voltage and resistance detection are controlled separately and tested at the same time, which makes the test more stable and reliable, effectively protects the stylus, prolongs its service life, and improves efficiency.
- 5.Withstand voltage: double insulation
- 6.The fully digital voltage regulation mode is automatically generated, accurate and reliable, and the defective products are automatically eliminated.
- 7.Working air pressure: 0.5-0.7MPa.
- 8.Applicable fields: rotors of electric tools, rotors of garden tools, rotors of vacuum cleaner motors, rotors of small household appliances, rotors of water pumps, rotors of automobile condenser fans, rotors of blower motors, rotors of push rod motors, rotors of electric forklift motors, rotors of glass lift motors, rotors of motors of automobile oil pumps , car window motor rotor, printer motor rotor, sewing machine motor rotor and other fields.
